**STATEMENT OF WORK (SOW)  
For the Repair of the  
Power Supply  
NSN 6130-01-426-4053  
P/N: 94008A1600; CAGE: 01365**

**1.0 Scope**

**1.1 Background**

This Statement of Work (SOW) establishes, sets forth tasks, and identifies the work effort that shall be performed by the Contractor to repair the Power Supply, 6130-01-426-4053; hereafter referred to as the Power Supply. This document contains requirements to restore the Power Supply to Condition Code "A". Condition Code A is defined as "serviceable/issuable without qualification, new, used, repaired or reconditioned materiel which is serviceable and issuable to all customers without limitation or restriction, including materiel with more than 6 months shelf-life remaining."

**2.0 Applicable Documents**

The following documents form a part of this SOW to the extent specified. Unless otherwise specified, the issues of these documents are those listed in the Department of Defense Index of Specifications and Standards (DODISS) and supplement thereto which is in effect on the date of solicitation. In the event of conflict between the documents referenced herein and the contents of this SOW, the contents of this SOW shall be the superseding requirement.

**2.1 Military Standards**

MIL-STD-129	DoD Standard Practice for Military Marking
MIL-STD-2073-1C	DoD Standard Practice for Military Packaging

**Military Standards (For Reference Only)**

MIL-STD-973	Configuration Management
-------------	--------------------------

**2.2 Military Specifications**

MIL-C-81309	Corrosion Preventive Compounds, Water Displacing, Ultra Thin Film
-------------	---

B) shall be used to report all anomalies and shall be provided to the government in accordance with section 4.0 of this SOW.

**3.2.2 Phase II (Repair)** After pre-induction tests and inspections have been completed, repair of the Power Supply shall be accomplished in accordance with this SOW. Deficiencies noted on the Pre-Induction Checklist (Appendix A and Appendix B) during Phase I shall be repaired/replaced. Components or assemblies shall not be disassembled for replacement of parts unless that part has failed, or the component assembly wherein the part is located is disassembled for repair.

a. Hardware

(1) Replace broken, unserviceable and/or missing hardware including nuts, bolts, screws, washers, turnlock fasteners, mandatory replacement items, safety, and one-time use items. Unserviceable would include any of the above that failed to function properly.

(2) *Ensure proper hardware locking devices are present on all moving mechanical assemblies.*

(3) Hardware normally supplied with commercial parts shall be used unless specifically prohibited.

b. Publications and Documentation The Contractor shall use appropriate technical documentation, as discussed in paragraph 1.1., to restore the Power Supply to condition code "A."

c. The following Standards and Publications shall be used to assist the Contractor:

MIL-C-81309	Corrosion Preventive Compounds, Water Displacing, Ultra Thin Film
247892-720	Test Specifications
247892-750	Test Procedures

**3.2.3 Phase III (Inspection, Testing and Acceptance)**

a. Inspection, Testing and Acceptance of the Power Supply shall be conducted in accordance with the documents listed in section 3.2.2.c and documentation retained by the manufacturer.

b. The Contractor shall be responsible for conducting required tests in accordance with applicable procedures and specifications.

c. The Contractor shall be responsible for correcting any deficiencies identified during inspection/testing. MCLB (Code 843-2), Albany, GA representatives may require the Contractor to repeat tests or portions thereof, if the original tests fail to demonstrate compliance with this SOW.

### **3.2.4 Phase IV (Packaging, Handling, Storage and Transportation (PHS&T))**

a. The contractor shall preserve and package equipment scheduled for long term storage or immediate shipment to overseas destinations in accordance with level "A" requirements of MIL-STD-2073-1C, Appendix A, Table A. VI, Electronic Equipment. Equipment scheduled for immediate shipment to Continental United States destinations shall be preserved and packaged in accordance with level "B" requirements of MIL-STD-2073-1C, Appendix A, Table A. VI, Electronic Equipment.

b. Marking of all items shall be in accordance with MIL-STD-129.

c. The Marine Corps will be responsible for transportation costs associated with shipping the Power Supply to/from the Contractor.

### **3.3 Government Furnished Equipment (GFE)/Materiel (GFM) Accountability**

a. GFE is government owned equipment authorized by contract for use by a commercial/Government contractor. It is neither consumed during production nor incorporated into any product. GFM is materiel furnished to a contractor that will be consumed during the course of production or incorporated into the product being manufactured/remanufactured under a contract/statement of work. In the event the Marine Corps does have GFE/GFM requirements, the Management Control Activity (MCA), Marine Corps Logistics Bases, Albany, Georgia, (Code G316-2), will coordinate required GFE and will maintain a central control system on Marine Corps assets in the Contractor's possession. The MCA will forward a GFE Accountability Agreement to the Contractor for signature to establish a chain of custody and property responsibilities for the Marine Corps assets.

b. Upon receipt of GFM, a copy of DD-Form-1348 is to be forwarded to the MCA (G316-2) for accountability purposes.

**3.4 Contractor Furnished Material** In the event that Contractor Furnished Material is required for repair parts, the *DOD 4000.25-1-M, (MILSTRIP) Chapter 11* authorizes contractors to requisition through the DoD Supply System. The Marine Corps has adopted the Navy's procedures regarding Contractor Furnished Material (NAVICPINST 4491.2A). This would require specific provisions in section H of the contract to place total responsibility on the contractor to obtain direct electronic access to the DoD Supply System, electronically submit their requisitions, maintain status, receive billing from the source of supply and provide direct payment to DFAS.

**3.5 Electrostatic Discharge (ESD) Control Program** The contractor shall establish, implement and document an ESD control program following the guidelines provided in EIA-625. ESD protective measures shall be used during manufacturing, handling, inspection, test, marking, packaging, storing and transporting ESD sensitive components.

**3.6 Quality Assurance Provisions** The Contractor shall provide and maintain a Quality System that as a minimum, adheres to the requirements of ANSI/ISO/ASQC Q9003-1994,

Quality System Model for Quality Assurance in Final Inspection and Test. The program shall ensure quality throughout all areas to include design, fabrication, processing, assembly, inspection, test, maintenance, and preparation for delivery and shipping. Unless otherwise specified in the contract, the contractor shall be responsible for performance of all inspection requirements. The Government reserves the right to perform any of the inspections set forth in the contract where such inspections are deemed necessary to assure products and services conform to the prescribed requirements.

**3.7 Acceptance** The performance of the Contractor and the quality of work delivered, including all equipment furnished and documentation written or compiled, shall be subject to in-process review and inspection during performance. Inspection may be accomplished in-plant or at any work site or location, and Marine Corps representatives shall be permitted to observe the work or to conduct an inspection.

**3.8 Rejection** Failure to comply with any of the specified requirements listed herein shall be reason for rejection by MCLB Code 843-2, Albany, representative. The Contractor shall, at no additional cost to MCLB, Albany, Georgia, correct the deficiencies and repeat the verification until an acceptable compliance with acceptance test procedures is demonstrated.

**3.9 Configuration Control** If necessary to temporarily depart from the authorized configuration, the contractor shall prepare and submit a Request for Deviation/Request for Waiver using MIL-STD-973, paragraph 5.4.3 or 5.4.4, and subparagraphs and Appendix E, as a guide. Any proposed permanent departures to the configuration baseline affecting fit, form, or function, shall require an Engineering Change Proposal using MIL-STD-973, paragraph 5.4.2 and Appendix D as a guide.

#### **4.0 Reports**

**4.1 Pre-Induction Checklist** The Contractor shall complete the Pre-Induction Inspection Checklist (Appendix A and Appendix B) for each Power Supply repaired. These documents shall be available prior to final acceptance testing. One copy of each document shall be provided to MCLB (Code 843-2) Albany, Georgia, after final acceptance of the Power Supply.

**4.2 Repairable Item Inspection Report** The Contractor shall provide a Repairable Item Inspection Report for each Power Supply. The report shall be identified by United States Marine Corps Serial Number.

**4.3 Monthly Progress Report** The Contractor shall provide a Monthly Progress Report summarizing the progress and status of the Power Supply Program.

**INSTRUCTIONS**

DEPARTMENT OF DEFENSE: DLAR 4140.55/AR 735.11.2/NAVSUPINST 4440.127E/APR 400.54/MCO 4430.3E, Reporting of Item and Packaging Discrepancies, and/or DLAR 4140.60/AR 12-12/NAVSUPINST 4920.9B/AFR 67.7/MCO 4140.1B, processing Discrepancy Reports Against Foreign Military Sales Shipments.
